

Blue Shield XLT

Engineered Temporary Surface Protection

Product Features

- Impact Protection – 28 mil Thick
- Spill Protection – Polymer Barrier
- Highly Tear Resistant and Durable
- Anti-Skid Surface – Wet or Dry
- Debris & Dirt Capturing Surface
- Easy to Handle, Cut & Tape
- Extremely Flexible and Conformable
- Offered in Labor Saving – 32", 48", 96" widths
- 100% Recyclable & Reusable

Product Sizes and Put-Ups

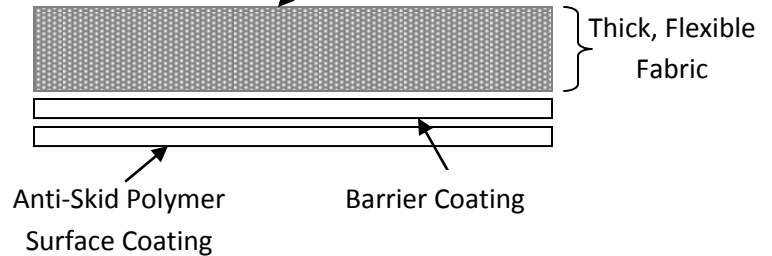

Roll Size	Rolls per Pallet	Roll Weight (lbs)
32" x 100'	42	12.5
48" x 100'	42	19
96" x 100'	42	37.5

Anti-Skid, Absorbent, Debris Capturing Walking Surface

Anti-Skid Walking Surface

XLT utilizes a unique fabric surface that is absorbent to liquids. Without puddles of liquids in wet conditions, XLT is engineered to provide superior anti-skid properties wet or dry.

Barrier Protection

The proprietary polymer coating on backside of the XLT has two distinct functional layers: barrier and skid resistance. The barrier coating layer provides an outstanding liquid barrier – far exceeding the performance of paperboard based products. The Anti-Skid coating layer provides traction between the product and solid surface flooring; helping to reduce the product from shifting. Taping is still recommended.

Easy and Time Saving to Install

XLT has excellent lay flat and rolls are safe to handle. Installation is expedited by wider width rolls and a product that is easily cut, taped, extremely flexible and formable. XLT is ideal for surface protection for walls, countertops, and other surfaces.

Made in USA
