

Talon Tape

Grab Hold!

Adhesive Free Hand Grip Locations incorporated into a robust strapping tape

What is Talon Tape?

Talon Tape is a robust, 3" wide fiberglass reinforced, PSA strapping tape that has hand grip locations that have no adhesive. The tape is designed to provide ergonomically positioned locations to grab hold of an item.

How it Works?

1. Talon Tape is applied to a box, bag or object with the hand grip location(s) positioned according to desired hold points.
2. Depending on the weight of the object, multiple Talon Tape strips can be used to generate added hold positions.
3. For maximum strength, Talon Tape should be applied in a loop orientation and taped back to itself.
4. Talon Tape is recommended for lifting objects up to 100 pounds in weight.

Talon Tape Features

Substrate: Fiberglass Reinforced PSA

Hand Grip Locations: Red Color Standard, Custom Logos and Colors Available

Standard Size: 72mm x 110 yds, custom lengths available
