

Film Specialty Products

What we do with film products?

Holland can co-extrusion coat and laminate several different types of films to enhance functional and appearance characteristics. All constructions are custom designed to enhance meet specified requirements such as adding tear resistance, stiffness, seal properties, etc.

Types of Films Processed

LDPE
LLDPE
HDPE
PP Cast
PET
Metalized films
Cross Laminated Films

Laminations

Additional Substrates
Paper, Linerboard, Nonwoven, Woven, Foils
Reinforcements
Fiberglass & PET Scrim, Woven

Coatings

Anti-Slip
Heat Sealant Layer
Durable Surface
Flame Retardant
Colors

Capabilities

Co-Extrusion Coating and Laminating

Max. Finished Roll Width = 103"
Max. Roll OD = 60"
Core Options: 3", 4", 6", 8" and 12"
Coating Weight Ranges: 1/2 to 4 mil
Maximum Substrate Thickness: 40 mil
