

Blue Shield **FlameStopR**

Product Specifications

Product Description: Blue Shield FlameStopR is a fire retardant, semi-permeable, reinforced laminated paper designed for protecting surfaces and materials.

Composition: FlameStopR is a proprietary combination of natural kraft papers and reinforcing fiberglass with a specialized laminate. Product is **Flame Retardant in accordance with NFPA 701.**

Grades & Sizes:

<u>Width</u>	<u>Length</u>	<u>Rolls per Pallet</u>
48"	300'	59

*** Custom sizing is available, contact Holland for more information***

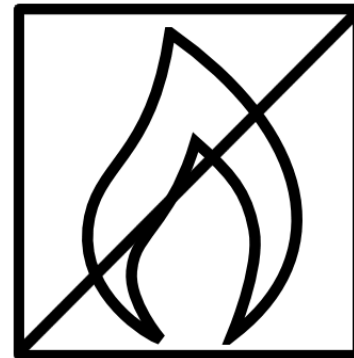

Flame StopR Features:

- Oil, grease and water-resistant barrier
- Reinforced for tear and puncture resistance
- Good MVTR (Moisture Vapor Transfer Rate)
- Non-bleed, non-staining
- Superior forming characteristics, easily folded without cracking or barrier loss.
- Slip resistant walking surface

MADE IN THE USA

Product Applications

- Paint booth paper
- Temporary floor protection
- Protective all-purpose wrapping paper
- Garment wraps
- Flame Retardant reinforced bags
- Flexible, oil resistant packaging paper
- Welding protective paper

Flame StopR

Fire Retardant Reinforced Paper

FlameStopR is durable, easy to use product that provides the assurance of fire safety without sacrificing the functionality of traditional reinforced paper products. The product is designed for temporary floor protection and paint booth lining applications.

How does it protect?

Fire Retardant

- Proprietary material combination provides a product that will not support a flame and is self extinguishing. Meets NFPA 701.

Barrier Protection

- Spills of paint, solvents, water, and other liquids will be resisted by the layer of laminate protecting surfaces.

Reinforced for Strength

- Fiberglass reinforcing provides the tear resistance that will prevent foot traffic from destroying the protective barrier.

Semi-Permeable Composite

- Unlike poly films, Blue Shield does not trap moisture condensation between itself and the floor.
