

Manufacturing Excellence

# Blue Shield Woven Wrap

## Woven Strength

Blue Shield Woven Wrap is highly durable, tear resistant product. The woven construction provides outstanding tensile, tear and burst strength while remaining lightweight and easy to form in wrapping applications.

## Barrier Protection

Woven Wrap is coated with white pigmented polyethylene which provides a resistant barrier to moisture, grease and oils. Unlike some competitors, Woven Wrap is coated with a full mil of polyethylene to assure a proper barrier.

## 100% Synthetic

Woven Wrap is a 100% synthetic constructed product. Unlike Holland's other poly-coated Blue Shield grades, there is no paper backing to the product. Therefore, Woven Wrap is 100% recyclable in normal plastic waste streams.

**Product Description:** Blue Shield Woven Wrap is a 100% synthetic, high strength barrier product that provided outstanding tear resistance.

**Composition:** Woven Wrap is a UV stabilized, 58 GSM woven fabric coated with 20 GSM white PP/PE on one side.

### Available Sizes:

**Widths:** 24", 36", 42", 48", 60", 72", 84", 96"

**Lengths:** 300' and 600'

(custom sizes are available by request)

### Additional Specifications:

- Woven Wrap contains some UV inhibitors but is not designed for extended outdoor UV exposure.
- 100% Recyclable
- Printable – 1 or 2 colors
- Intended for Industrial Use Only
