Tape Head Replacement Program – The compact design of the tape head allows for integration into select side belt driven case sealers. Retrofit your existing pressure sensitive case sealing equipment with a WAT taping head for a fraction of the cost of a new machine.

CONVERT PSA TO WAT

Step 1: Evaluating the compatibility of your existing case sealer.

Step 2: Receive a Retrofit Quotation

Step 3: Send your existing case sealer to Holland

Step 4: Receive your New WAT capable case sealer

Compatibility Requirements

1. Existing case sealer must be side belt driven.
2. Ample space existed below and above the existing PSA tape heads.

Estimated Lead Time:

Most conversions will be achieved with 4-6 weeks of machine arrival.

Estimated Costs:

The average retrofit will cost \$25,000. Costs are dependent on existing machine configuration.

Warranty & Service:

Retrofit performance has a 2-year warranty – parts and labor. This warranty can be extended with commitments for tape purchases from Holland.

For more information about new or retrofit case sealing options, please contact Holland at sales@hollandmfg.com or call 973-584-8141.
