

WAT Case Sealing Technology

The A600 Automated, Random Size WAT Case Sealer utilizes EVI's patent head technology to secure seal corrugated boxes up to 600mm wide x 600mm tall with water activated tape.

The A600 adjusts automatically to the size of the box with smooth, servo-driven control and applies a properly sized piece of water activated tape to the top and bottom of the box.

A600 – Automated, Random Size WAT Case Sealer

Key Features

- Innovative water pump to ensure proper moistening and maximum adhesion.
- Unique air piston driven 4-roller wipe down system ensures that cases stay closed.
- Smooth infeed and carton indexing for maximum throughput.
- Flap Folder (optional) to introduce the cartons with no human interface.
- Pneumatic raising bottom head allows for tape roll changes above the conveyor line (no crawling on the floor to mount and thread the tape).
- PLC driven touch screen controller with up to 5 language prompts.

Technical Specifications

Minimum Case Size (LxWxH)	10" x 6" x 6"
Maximum Case Size (LxWxH)	Unlimited x 24" (600mm) x 24" (600mm)
Maximum Carton Weight	70 lbs.
Electrical Specifications	230V x 24A
Water Requirement / Capacity	Deionized Water - 1.3 Gallon Tank (5L)
Air Requirements	100 PSI (System) 85 PSI (Machine) Water Separator and Blocking Valve
Guarding / Safety	<ul style="list-style-type: none"> • Bump Curtain on Opening • Limit Switches on Doors, Locks on Cabinets • Blue Lexan Protective Shields • CE Approval and Meets or Exceeds the Latest Safety Directives
