

WAT Case Sealing Technology

The E600 Uniform Size WAT Case Sealer utilizes EVI's patent head technology to secure seal corrugated boxes up to 600mm wide x 600mm tall with water activated tape.

The E600 adjusts to the size of the box by turning a set of precise, metered hand cranks. The smooth, side belt drive translates the box and the machine applies a properly sized piece of water activated tape to the top and bottom of the box.

E600 – Uniform Size WAT Case Sealer

Key Features

- Innovative water pump to ensure proper moistening and maximum adhesion.
- Unique air piston driven 4-roller wipe down system ensures that cases stay closed.
- Smooth infeed and carton indexing for maximum throughput.
- Pneumatic raising bottom head allows for tape roll changes above the conveyor line (no crawling on the floor to mount and thread the tape).
- PLC driven touch screen controller with up to 5 language prompts.
- More economical than the A600 and M600; for applications that change box size less often.

Technical Specifications

Minimum Case Size (LxWxH)	10" x 6" x 6"
Maximum Case Size (LxWxH)	Unlimited x 24" (600mm) x 24" (600mm)
Maximum Carton Weight	70 lbs.
Electrical Specifications	230V 24A
Water Requirement / Capacity	Deionized Water - 1.3 Gallon Tank (5L)
Air Requirements	100 PSI (System) 85 PSI (Machine) Water Separator and Blocking Valve
Guarding / Safety	<ul style="list-style-type: none"> • Two-Handed Push button control for bottom tape head roll changes. • CE Approval and Meets or Exceeds the Latest Safety Directives
