

WAT Case Sealing Technology

The M600 Semi-Automated, Random Size WAT Case Sealer utilizes EVI's patent head technology to secure seal corrugated boxes up to 600mm wide x 600mm tall with water activated tape.

The M600 adjusts to the size of the box via operator input into the HMI screen. After accurately adjusting to the directed size, the M600 applies water activated tape to the top and bottom of the box.

M600 – Semi-Automated, Random Size WAT Case Sealer

Key Features

- Innovative water pump to ensure proper moistening and maximum adhesion.
- Unique air piston driven 4-roller wipe down system ensures that cases stay closed.
- Smooth infeed and carton indexing for maximum throughput.
- Pneumatic raising bottom head allows for tape roll changes above the conveyor line (no crawling on the floor to mount and thread the tape).
- PLC driven touch screen controller with up to 5 language prompts.
- More economical than the A600; for applications that change box size less often.

Technical Specifications

Minimum Case Size (LxWxH)	10" x 6" x 6"
Maximum Case Size (LxWxH)	Unlimited x 24" (600mm) x 24" (600mm)
Maximum Carton Weight	70 lbs.
Electrical Specifications	230V x 24A
Water Requirement / Capacity	Deionized Water - 1.3 Gallon Tank (5L)
Air Requirements	100 PSI (System) 85 PSI (Machine) Water Separator and Blocking Valve
Guarding / Safety	<ul style="list-style-type: none"> • Bump Curtain on Opening • Limit Switches on Doors, Locks on Cabinets • Blue Lexan Protective Shields • CE Approval and Meets or Exceeds the Latest Safety Directives
