

# WAT Case Sealing Technology

The C600 Uniform Size WAT Case Sealer utilizes EVI's patent head technology to secure seal corrugated boxes up to 600mm wide x 600mm tall with water activated tape.

The C600 adjusts to the size of the box by turning a set of precise, metered hand cranks. The smooth, side belt drive translates the box and the machine applies a properly sized piece of water activated tape to the top and bottom of the box.

## C600 – Uniform Size WAT Case Sealer

### Key Features

- Innovative water pump to ensure proper moistening and maximum adhesion.
- Unique air piston driven 4-roller wipe down system ensures that cases stay closed.
- Smooth infeed and carton indexing for maximum throughput.
- Manually raising bottom head allows for tape roll changes above the conveyor line (no crawling on the floor to mount and thread the tape).
- PLC driven touch screen controller with up to 5 language prompts.
- More economical than the E600 featuring a cost-efficient frame and conveying system.

### Technical Specifications

<b>Minimum Case Size (LxWxH)</b>	10" x 6" x 6"
<b>Maximum Case Size (LxWxH)</b>	Unlimited x 24" (600mm) x 24" (600mm)
<b>Maximum Carton Weight</b>	50 lbs.
<b>Electrical Specifications</b>	230V 24A
<b>Water Requirement / Capacity</b>	Deionized Water - 1.3 Gallon Tank (5L)
<b>Air Requirements</b>	100 PSI (System) 85 PSI (Machine) Water Separator and Blocking Valve
<b>Guarding / Safety</b>	<ul style="list-style-type: none"> <li>• Manual Bottom Head movement for roll changes.</li> <li>• CE Approval and Meets or Exceeds the Latest Safety Directives</li> </ul>
